State of Hawai'i

Hawai'i Emergency Management Agency

Multi-Year Training and Exercise Plan

2020-2022 (January 2020)

Approved by HI-EMA Executive Officer, Luke Meyers as of December 24, 2019

This page intentionally left blank.

Preface

The State of Hawai'i is especially vulnerable to natural disasters due to its unique geographical setting. That was never more evident than in 2018 when federal emergency and/or disaster declarations were approved for four events in four months as floods and landslides, a volcanic eruption and two hurricanes impacted the state.

The citizens of Hawai'i have demonstrated remarkable resilience in the aftermath of these incidents and other previous disasters. The ever-present threat posed by a number of hazards, compounded by Hawai'i's remote geographic location, underscores the need for a comprehensive, all-hazards approach toward emergency preparedness and response.

The State of Hawai'i, in its efforts to prevent, protect, mitigate against, respond to and recover from a broad range of natural and humane incidents, has embraced a capabilities-based approach to training and exercising. As part of this approach, Hawai'i has identified a need to coordinate planning, training, and exercising to strengthen overall proficiency in executing the 32 "core capabilities" defined in the National Preparedness Goal. Training and exercising play a crucial role in this process and provide Hawai'i with a strategy for attaining, practicing, validating and improving new capabilities.

The Multi-Year Training and Exercise Plan (TEP) is shaped by input from stakeholders across all levels of government, the private sector and non-governmental organizations. It reflects the state's commitment to providing a culture that promotes continuous learning and improvement.

The TEP is a product of the Hawai'i Emergency Management Agency (HI-EMA) and the state's Office of Homeland Security (OHS). The mission of the Hawai'i Emergency Management Agency is to institute training, preparedness and public-information programs in coordination with the state, counties, the federal government, other states and private-sector and nonprofit organization. (Hawai'i Revised Statutes 127A). The training mission of the state's OHS is to provide programs, in coordination with county agencies, other state and federal agencies, and the private sector, to educate and train publicly and privately employed workers and the general public to be prepared for potential attacks. (Hawai'i Revised Statutes 128A-1).

Purpose

The purpose of the Multi-year Training and Exercise Plan (TEP) is to document the state's overall training and exercise program priorities. These priorities are linked to core capabilities essential to achieving the National Preparedness Goal, and are informed by the State of Threat and Hazard Identification and Risk Analysis

“A secure and resilient nation with the capabilities required across the whole community to prevent, protect against, mitigate, respond to, and recover from the threats and hazards that pose the greatest risk.”

- National Preparedness Goal

(THIRA)/Stakeholder Preparedness Review (SPR), After-Action Reports/Improvement Plans, the Training and Exercise Planning Workshop (TEPW), and other requirements set forth by senior leadership, statute and grant guidance.

The Multi-year TEP lays out a combination of progressively building exercises – along with the associated training requirements – which address the priorities identified throughout the year. A progressive, multi-year exercise program enables organizations to participate in a series of increasingly complex exercises, with each successive exercise building upon the previous one until mastery is achieved. Further, by including training requirements in the planning process, our organization can address known shortfalls prior to exercising capabilities.

Included in this Multi-year TEP is a training and exercise schedule, which provides a listing of proposed activities scheduled for the calendar years 2020 through 2022.

Methodology

The following sources were used to help identify risks and establish priorities for this TEP include the following:

- **2018 Hawai'i State Hazard Mitigation Plan (SHMP)**

The SHMP identifies the major natural hazards that affect our state, assesses the risk that each hazard poses, analyzes the vulnerability of our people, property and infrastructure to the specific hazard, and recommends actions that can be taken to reduce the risk and vulnerability to the hazard.

- **2018 Threat and Hazard Identification and Risk Assessment and Stakeholder Preparedness Review (THIRA/SPR)**

The THIRA/SPR identifies hazards of greatest concern to the state, assesses the state's capabilities to address those hazards, identifies gaps and strategies for addressing those gaps.

- **2018 Hawai'i Joint Counterterrorism Awareness Workshop Series (JCTAWS)**

JCTAWS is a nationwide initiative designed to improve the ability of local jurisdictions to prepare for, protect against, and respond to complex terrorist attacks.

- **After-Action Report/Improvement Plan (AAR/IP): 2018 Disasters**

A consolidated AAR/IP was produced for the state response to the 2019 disasters including the April 2018 floods, the May 2018 Kīlauea Eruption and the responses to Hurricanes Lane and Olivia.

- Input from State of Hawai'i Departments, county emergency management agencies and non-governmental partners through the Training and Exercise Planning Workshop.

- The purpose of the Emergency Management Performance Grant Program (EMPG) is to provide Federal funds to states to assist state, local, territorial and tribal governments in preparing for all hazards.

The state training and exercise program utilizes the Homeland Security and Exercise Evaluation Program (HSEEP) methodology and process to plan, develop and conduct all exercise and training.

State Training and Exercise Planning Workshop (TEPW)

The TEP is a product of the Training and TEPW, which was hosted by the HI-EMA hosted on October 10, 2019. Participants included representatives from the state, county and federal agencies, as well as from nonprofit organizations and the private sector.

The sources above were presented to participants, as well as existing state emergency management and homeland security priorities. Group discussions were held to validate proposed training and exercise priorities and identify specific capability elements to sustain and build through the training and exercise programs.

TEPW participants then reviewed the schedule of planned training and exercises to de-conflict events.

Future TEPWs will be conducted on the 1st Quarter of the year (Jan-Mar), rather than the 4th Quarter of the year (Oct-Dec) due to continuous improvement of our training and exercise program. The next TEPW is scheduled for January 12, 2021.

Training and Exercise Program Priorities

Identification of Program Priorities

The 2020 – 2022 Training and Exercise Program priorities for the current training and exercise cycle were determined by the state and counties, and the supporting core capabilities are based on stakeholder input provided at the TEPW. The priorities focus on threats and hazards from our State Threat and Hazard Identification and Risk Assessment (THIRA) and areas identified for improvement in After Action Reports/Improvement Plans (AAR/IPs) from real events and exercises. A Corrective Action Program (CAP) is being implemented that will track and validate corrective actions in future exercises. Grant funding requirements and other reports, such as the State Preparedness Report (SPR), were also considered when determining the program priorities.

Factors for Consideration in Developing Exercise Program Priorities

Program Priorities for the 2020 to 2022 Training and Exercise Cycle

The state's priorities for training and exercise reflect core capabilities determined to present the greatest challenges to the state's preparedness. In addition, the state has identified a set of core capabilities that are standing priorities for training and exercise due to their criticality across all mission areas and/or their importance to ensuring success in other capability areas.

Response Mission Area

- Critical Transportation
- Logistics and Supply Chain Management
- Mass Care Services

Recovery Mission Area

- Housing

Protection Mission Area

- Cybersecurity (Homeland Security)
- Physical Protective Measures (Homeland Security)
- Risk Management for Protection Programs and Activities (Homeland Security)

Common Core Capabilities

- Planning
- Operational Coordination
- Operational Communication

Critical Transportation

The **2015 State of Hawai'i Catastrophic Hurricane Annex** and subsequent planning efforts during the last training and exercise cycle (2017-2019) to examine the state's critical transportation systems and their dependencies, brought into sharp focus the magnitude of the logistical challenges the state will face following a major disaster. As a result, major planning initiatives are underway to address these issues and it is a priority of the training and exercise program to support the development of those plans.

Debris Management The training and exercise program will support statewide debris management planning. Debris management will be a focus of the state's annual hurricane exercise for the 2020 – 2022 cycle. The debris management exercise objective is to develop a tactical debris management plan. In addition, mutually develop at the same time the state debris management operational support plan based on the anticipated requests or deficiencies identified in the county debris management tactical plans.

Port Restoration Port restoration will be a focus of the state's annual hurricane exercise for the 2020 – 2022 cycle. The port restoration exercise objective for 2020 is to develop a port restoration plan that has the capability to restore sea port operations at the Port of Honolulu. The state exercise objective is to develop a port restoration operational support plan that has the capability to restore sea port operations at the Port of Honolulu. The focus on sea port restoration will continue next year 2021 and expand to neighbor island commercial sea ports.

Rationale for Critical Transportation Focus

- Hawai'i Emergency Management Agency Critical Systems Analysis (2016)
- State of Hawai'i Hazard Mitigation Plan (2018)
- State of Hawai'i Threat and Hazard Identification and Risk Assessment (2018)
- State and County debris plans

Supporting Training

- Debris Management Planning Workshops (See Multi-year Training and Exercise Schedule)
- Port Restoration Planning Workshops (See Multi-year Training and Exercise Schedule)

Supporting Exercises

- Debris Management Tabletop Exercise (See Multi-year Training and Exercise Schedule)
- State/C&C of Honolulu Port Restoration Tabletop Exercise (See Multi-year Training and Exercise Schedule)

State Agency Readiness

On August 11, 2015, Gov. David Ige signed Administrative Directive No. 15-01, requiring each state agency and department in the Executive Branch to establish minimum emergency management requirements. An ongoing focus for the Hawai'i Emergency Management Agency has been on providing training and exercise support to help departments meet these requirements and improve their readiness to execute their emergency and essential functions during a disaster requiring state support. Specifically, the training and exercise program seeks to increase the capabilities of state agencies in the areas of planning, operational coordination, situation assessment and operational communication.

Continuity of Operations Planning The Administrative Directive requires all state agencies to maintain a Departmental Emergency Operations Plan (EOP) and a Continuity of Operations Plan (COOP). While departments have made progress in developing EOPs, continuity planning remains a major gap. Continuity planning will be a priority for the training program, and the exercise program will focus on creating opportunities for departments to test and validate completed plans.

State Emergency Response Team Curriculum The Administrative Directive requires each department to identify Emergency Management Officers (EMO) and State Emergency Support Function (SESF) representatives. These positions, along with HI-EMA staff, collectively make up the State Emergency Response Team (SERT). HI-EMA will sustain and continue to expand the SERT curriculum to ensure SERT members understand their roles and how they fit into state plans. The state will continue regular delivery of *State Emergency Response Team (SERT) Orientation* and *WebEOC Training*. New priorities include the development of training on State Emergency Response Function (SESF) roles, adding an emergency management component of new employee orientation statewide and drills to maintain familiarity with SEOC operations.

Senior Leader Role in Emergency Response/Recovery Continue to educate the senior leadership in the Hawaiian Islands and potential members of the Unified Coordination Group on their role in a catastrophic incident and what types of challenges they can expect and decisions that they may have to make, by discussing selected critical issues i.e. post disaster housing and decision points.

Corresponding Core Capabilities

- Planning
- Operational Coordination
- Operational Communication
- Situation Assessment

Rationale for Focus on State Agency Readiness

- Administrative Directive No. 15-01 <https://dod.hawaii.gov/hiema/files/2017/08/AD-15-01-Emergency-Management-Preparedness-Requirements-for-Departments.pdf>
- State of Hawai'i Threat and Hazard Identification and Risk Assessment (2018)
- HI-EMA Training Survey (October 2016)
- State of Hawai'i Emergency Operations Plan (May 2017)
- After-Action Report/Improvement Plan (AAR/IP): 2018 Disasters
- After-Action Report/Improvement Plan (AAR/IP): 2019 Makani Pahili 2019 Exercise

Supporting Training

The following courses will be considered for the HI-EMA Staff, Emergency Management Officers and the State Emergency Response Team (SERT) curriculum.

Independent Study Courses

Supporting Exercises

- Statewide WebEOC Workshop – Makani Pahili Hurricane Exercise (See Multi-year Training and Exercise Schedule)
- Distance Tsunami Drill – (See Multi-year Training and Exercise Schedule)
- Local Tsunami Drill – (See Multi-year Training and Exercise Schedule)
- Executive Senior Leader Workshop – (See Multi-year Training and Exercise Schedule)
- Senior Leader Seminar – Makani Pahili Hurricane Exercise – (See Multi-year Training and Exercise Schedule)

Operations Section Chief Vic Gustafson gives instructions to the State Emergency Response Team at the State Emergency Operations Center. Emergency Support Function representatives from state agencies activated during the multiple disasters in 2018, which included flooding, mudslides and landslides, Kīlauea Volcano's eruption at the summit and the lower east rift zone on the Big Island and Hurricanes Lane and Olivia. (State of Hawaii photo)

Mass Care/Logistics and Supply Chain Management

The ability to deliver mass care services will continue to be a top priority for the current training and exercise cycle. Assumptions contained in the **2015 State of Hawai'i Catastrophic Hurricane Annex** show that mass care support requirements following a major disaster would be extensive. Given Hawaii's isolation, dependency on imports for critical supplies, reliance on a single hub port and a just-in-time logistics system, the ability to deliver essential mass care services is inextricably linked to logistics and supply chain management.

Training will support stakeholder engagement and understanding of their roles and responsibilities. The formalization of plans and mass care operational coordination structures will be supported by workshops, with a goal of testing plans in more complex exercises as plans are developed. Sheltering will continue to be a focus, with greater emphasis on post-impact shelters, as well as points of distribution and feeding.

Rationale for Mass Care/Logistics and Supply Chain Management Focus

- Makani Pahili 2017 Shelter Resourcing Workshop After Action Report/Improvement Plan
- State of Hawai'i Threat and Hazard Identification and Risk Assessment (2018)
- State of Hawai'i 2015 Catastrophic Hurricane Annex
- FY18/FY19 Emergency Management Performance Grant

Supporting Training Courses

Independent Study Courses

The following training courses are available online and will be promoted to mass care stakeholders:

Course Number and Title	Link
IS-235 Emergency Planning	https://www.training.fema.gov/is/courseoverview.aspx?code=is-235.b

IS-26 Guides to Points of Distribution	https://training.fema.gov/is/courseoverview.aspx?code=IS-26

Classroom Courses

The following classroom-based courses will be prioritized for delivery during the current training cycle:

Course Number and Title	Link
E-0411 Mass Care/Emergency Assistance for Field Operations (EMI Campus or Resident Delivery)	https://training.fema.gov/emcourses/docs/fy16%20catalog.pdf
G-108 Community Mass Care and Emergency Assistance	http://www.nationalmasscarestrategy.org/wp-content/uploads/2014/07/cmcea_factsheet.pdf

Housing

The Kīlauea eruption of 2018 was the first disaster since Hurricane Iniki in 1992, and the first since the release of the National Recovery Framework, that has entailed a prolonged and complicated recovery period. One of the many gaps in the state’s recovery capabilities the disaster revealed was the lack of readiness to address post-disaster housing, both on a temporary and long-term basis. This capability gap is not unique to Hawaii and was evident across jurisdictions impacted by catastrophic hurricanes in 2017 and 2018. As a result, FEMA added a requirement into its FY18 and FY19 Emergency Management Performance Grant (EMPG) Program that states include housing as a component of their exercise programs.

To meet this requirement, HI-EMA will hold housing workshops to present lessons learned from the 2018 eruption and drive the development of state and county housing task forces.

Rationale for Housing Focus

- After-Action Report/Improvement Plan (AAR/IP): 2018 Disasters
- State of Hawai’i Hazard Mitigation Plan (2018)
- State of Hawai’i Threat and Hazard Identification and Risk Assessment (2018)
- FY18/FY19 Emergency Management Performance Grant

Supporting Training

FEMA Individual and Households Program Unified Guidance (IHPUG) will be reviewed to develop training and exercises. THE IHPUG is a comprehensive reference containing policy statements and conditions of eligibility for all forms of Individual and Household Program assistance.

The guidance can be found at this link: <https://www.fema.gov/ihp-unified-guidance>.

- State of Hawaii Agencies and Departments Leadership Workshop – (See Multi-year Training and Exercise Schedule)
- Housing-Specific PELP Workshops – (See Multi-year Training and Exercise Schedule)

Protection Mission Area

Cybersecurity

The State Office of Homeland Security (OHS) has identified the following priorities related to cybersecurity:

- Implement risk-informed guidelines, regulations, and standards to ensure the security, reliability, integrity, and availability of critical information, records, and communications systems and services through collaborative cybersecurity initiatives and efforts.
- Implement and maintain procedures to detect malicious activity and to conduct technical and investigative-based countermeasures, mitigation and operations against malicious actors to counter existing and emerging cyber-based threats, consistent with established protocols.
- Provide cyber security awareness training and education based on levels of expertise.
- Coordinate with Department of Education/University/Academia to build the cyber resiliency for the state.
- Establish a baseline of current cyber state with critical lifelines critical infrastructure sectors.
- Complete Cyber Security Response Plan.

Rationale for Cybersecurity Focus

The Framework for Improving Critical Infrastructure Cyber Security stresses the Cyber Security threat exploits the increased complexity and connectivity of critical infrastructure systems thus putting the nation and the state of Hawai'i's security, economy and public safety and health at risk. Presidential Policy Directive PPD-41 provides details for cyber and cyber security.

Training

Additional trainings for this Core Capability can be found at www.firstrespondertraining.gov/frts/nppccatalog

Course Number and Title	Links
AWR-136 Essentials of Community Cyber Security	https://www.firstrespondertraining.gov/frts/nppccatalog?id=39
MGT 384 Community Preparedness for Cyber Incident	https://www.firstrespondertraining.gov/frts/nppccatalog?id=542
MGT-452 Physical and Cyber Security for Critical Infrastructure	https://www.firstrespondertraining.gov/frts/nppccatalog?id=3322

School Safety

School safety has become a priority for Homeland Security programs. Those of outside of educations understand there is no greater imperative than keeping students safe. Hawaii schools are experiencing more threats, and at the same, time more threats are being reported. The Hawaii State Fusion Center sponsors

SafeKekei for reporting incidents. The schools have processes and procedures, however, staffing in the Security Office is a concern.

The Office of Homeland Security is supporting Department of Education with the STOP Grant with the goal to assist with an intervention program to help prevent an incident and to assist in providing support to youth who portray behavior contrary to school guidelines.

The Office of Homeland Security supports the DOE with their annual Emergency Preparedness Program.

Training

Additional trainings for this Core Capability can be found at www.firstrespondertraining.gov/frt/npccatalog

MGT 467 Sports and Special Events Public Information and Emergency Notification	
MGT 412 Sports Venue Evacuation and Protective Action Course	
Active Shooter Training	Honolulu Police Department

Operational Coordination

The following objectives have been identified in support of Operational Coordination related to homeland security.

- Process for mobilization of resources to support different homeland security scenarios – e.g. active shooter; complex coordinated attack; explosion; vehicle ramming.
- Process for allocating limited resources for events (Chemical, biological, radiological and nuclear defense [CBRNE], canine, etc.)
- Continue support to the responder community with command, control and coordination processes through planning, training, and exercises.

Rationale for Operational Coordination Focus

The Joint Counterterrorism Awareness Workshop identified several areas of improvement.

Training and Exercise

Additional training is available at www.firstrespondertraining.gov/frt/nppcatalog.

Course Number and Title	Link
ISC-300 Intermediate ICS for Expanding Incidents	https://www.eventbrite.com/
ICS-400 Advanced ICS for Command and General Staff	
PER 335 Complex Coordinate Terrorist Attack	
PER 340 Active Threat Integrated Response Course (ATRIC)	
Development of complex coordinated attack tabletop exercise (2020)	

Critical Infrastructure

The prevention and protection of critical infrastructure is a priority for OHS. Areas requiring attention include but not limited to:

- Update/reassess the Critical Infrastructure Assessments for the State of Hawai'i.
- Develop countermeasures for systems, networks, assets based on assessment of critical infrastructure.
- Through the Fusion Center identify and assess the threats to state of Hawai'i; provide materials and products for federal, state, private and public sector for information and steps to assess and reduce risk.

Rationale for Infrastructure Systems Focus

Identify the lifelines and their criticality to the state and the nation.

Training

Additional trainings can be found at www.firstrespondertraining.gov/frt/npccatalog.

Maintenance Section

The Training and Exercise Plan (TEP) is a living document owned by HI-EMA Preparedness Branch that will be updated and refined annually. The plan covers the overall training and exercise program priorities for a three-year period, with the acknowledgment that priorities may be adjusted to address changing circumstances.
